

**The Dependencies
You Didn't Know You
Had**

1. a thing

1. a thing
2. that you have to support

1. a thing
2. that you have to support
3. and unless you pay money nobody will help you

1. a thing

1. a thing
2. that someone else maintains for free and for which help is generously given for free

1. a thing
2. that someone else maintains for free and with which help is generously given for free
3. that makes your life easier

Code specific knowledge (aka legacy code)

"No, we don't ever push view controllers. There are methods on the root view controller that present and hide for us. Use the enum to specify how you want to present the view controllers."

Code specific knowledge (aka legacy code)

"Call the `FacebookHandler`. Except for login. Yeah, don't use that method."

Conceptual knowledge (aka "Why Does Your JSON Parsing Look Like Hieroglyphs?")

"It's easy, you just have to know where to bind your monad to the right function."

Conceptual knowledge (aka "Why Does Your JSON Parsing Look Like Hieroglyphs?")

"It's easy, you just have to call `getObject:` on the provided factory and then pass it into the initializer as a configuration object before passing it on to the final network request in the graph."

Tool specific knowledge (aka "Why Did Nokogiri Fail To Compile?")

"Have you tried using RVM?"

Tool specific knowledge (aka "Why Did Nokogiri Fail To Compile?")

"Did you `git reset --hard`? Oh, wait, you tried to add a submodule? `git rm`, I think. Shoot, `rm -rf`. Huh?"

Culture specific knowledge

Culture specific knowledge

"You reverted my PR!"

DON'T PANIC!

**Thanks to Ash Furrow
for his feedback**

**Thanks to my wife
Lisa for making me do
this**

**Thanks to you all for
listening**
